EGN 1932   Homework 1 (I Can Tell When You're Faking)   5 Points

Flip a coin 200 times and record your results. Or, *make believe*
that you flipped a coin 200 times, and record the sequence that you
faked to *appear* to be an actual random sequence.

Report your sequence in 10 lines of 20 flips, denoting HEAD by X and
TAIL by O. Don't indicate on your paper whether your sequence is
real or fake; I will tell you which it is.
