## Job Opportunity at The Tolly Group Companies

The Tolly Group is offering an opportunity to work with the industry's cutting-edge technology and be actively involved in the testing and evaluation process. This is a unique opportunity to learn first-hand about **today's** hottest technologies and products in the industry's most dynamic and rapidly growing strategic consultancy and test facility. For more info, visit [www.tolly.com](http://www.tolly.com).

The Tolly Group is seeking motivated internship candidates for our new Boca Raton Facility. As a Network Engineer, they will be required to set up test beds, run tests, and interface with internetworking vendor technicians to configure equipment and solve problems that arise during testing. The engineer will be working with a wide variety of cutting edge technologies including Network Storage, Security, Voice over IP (VoIP) & Wireless.

- To apply knowledge, skills and professionalism to testing and validation projects.
- To run high quality, unbiased tests that yield accurate and fair results.
- To produce high-quality documentation which supports the testing data.
- To handle technical questions of customers in a thorough, deliberate and professional manner.
- To share knowledge and skills with other members of the engineering team so the department runs efficiently and synergistically.
- To lend support to fellow co-workers when they can benefit from your insight.

Please contact the following person if you are interested.
