

# Announcement

10/29/10

1. The due date of your HW#2 has been extended to this Sunday, 10/31/10, before 11:00pm. This new due date is for all students in this class. No late assignment will be accepted after this due date.
2. `getToks.c` has been rewritten. For simplicity, this new program will treat a valid string name as a sequence of characters terminated by a blank or a double quote ("). No string name can have embedded space in it.
